THE HIGHEST EXPRESSION OF CUSTOM UPHOLSTERY

THE FOUNDERS POINT OF VIEW...ONE AT A TIME

Today's younger professionals want to make a statement about who they are. They want to show that they care about their surroundings, that they are achieving their goals. When they leave the maelstrom of activity each night and return to their apartments and homes, they are seeking a peaceful haven, they want a refuge from nerve-wracking stimuli. They want to return to the luxurious world of their own individuality.

Avery Boardman creates sofas, sofa beds, and custom upholstery that meet these high standards by making them one at a time. This company is the oldest firm in the world manufacturing and selling sofa beds exclusively to the design community. My philosophy is, "Being the biggest isn't as important as being the best. I think customers understand the difference and are willing to pay more for an individually-crafted piece of furniture. That's why our entire manufacturing operation promotes individuality."

I spend whatever amount of time necessary to insure that the style, the design, the comfort of each piece is perfect. At our headquarters in New Jersey, every employee has to sign off on every facet of his work. That means every cutter, every woodworker, every upholsterer has a sense of individual pride.

Our pieces are constructed with kiln-dried hardwood frames that are doweled, glued and installed with the finest mechanism ever designed to house the high-coil count, inner-spring mattress. Our workmen are craftsmen who have the expert knowledge to work with down-and-feather, spring-and-down, and foam-and-down. Every step is a high-quality effort. The result is that our furniture has a look and feel that separates it from all the others.

Albert de Matteo

Founder

Avery Boardman, Ltd.

STYLE 159 NOVA

For the past 5 decades, Avery Boardman has perfected the art of handcrafting the finest sofa beds in the world.

Our sofa beds, like our stationary furniture, are built with meticulous attention to detail according to the same high standards as our finest custom stationary sofas.

Our custom capabilities are virtually limitless from the cushion selection and mattress sizes to the endless detail and tailoring options.

All of our styles feature our exclusive "STEELWEAVE" mechanism, comprised entirely of steel.

An intricate chain link, wire and spring support deck substitutes the commonly used polypropylene deck (blue or gray synthetic canvas).

An all steel mechanism is the only way to ensure a sag-less frame guaranteed to provide a comfortable night's sleep.

Our mechanism is equipped with a head-rest feature for added comfort, when reading or watching television.

All styles are available with the following size mechanisms and mattresses:

- 65" super queen
- 60" queen
- 53" full or double
- 40" three quarter
- 37" twin
- 24" chair bed

To complete our fantastic sleeping system, we offer 4 types of mattresses.

- 4" qualuxe foam
- 5.5" tufted innerspring
- 5.5" tufted reversible innerspring
- 11" airluxe (only available in 60" and 53").

STYLE 125

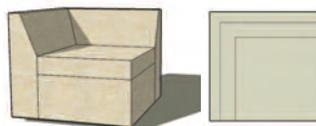

At Avery Boardman, sectionals are simply part of our day to day business. No other company understands sectionals as well as we do.

Sectionals can be made to your exact specifications and can contain sleeping mechanism, reclining modules and chaises in both standard and custom designs. To facilitate the delivery, all sectionals can be made so that the various components can be assembled on site.

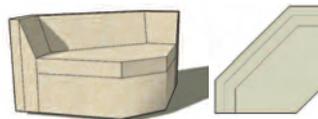

Any style in this catalog can be adapted and made into a sectional in any shape and size. Arms, base, cushion style and detail can be specified to harmoniously come together to create the most ideal seating configuration for your space and lifestyle.

Below are a few example of different components that are available as part of our sectional collection.

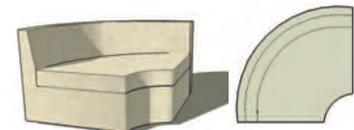

All components are available in both right or left facing configuration. Drawings are in both perspective and plan view.

STYLE 110

With back cushions.

No back.

Opened

Measuring only 30" deep, bench beds are ideal when there is a need to accommodate the extra guest in extremely small quarters.

In a perfect marriage of functionality and outstanding design, bench beds offer the same custom options as the rest of the Avery Boardman line. They can be incorporated into sectional configurations and are available with any

arm, cushion and detail options.

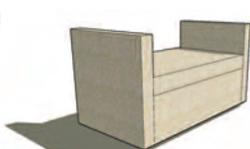

All components are available in right or left facing, with or without backs.

In the absence of a stationary back, back cushions can rest against a wall.

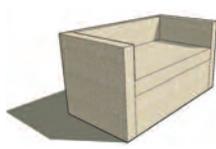

Bench beds are available with a 32", 53" or 60" mattress. Mattresses are 75" long and made of 3" high density foam.

CUSHION OPTIONS

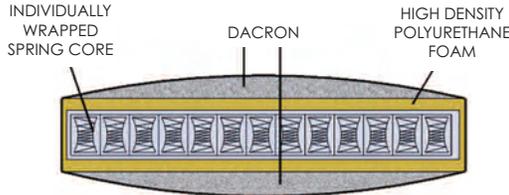

Though comfort is subjective, quality is certainly not. One of the most challenging aspects of today's furniture making is meeting the clients demand for comfort and individual lifestyle preferences without compromising the quality and the longevity of the cushion.

In the past 50 years Avery Boardman has developed a vast array of filling materials ranging from hypo-allergenic polyurethane foam, to the highest proportions of down & feathers.

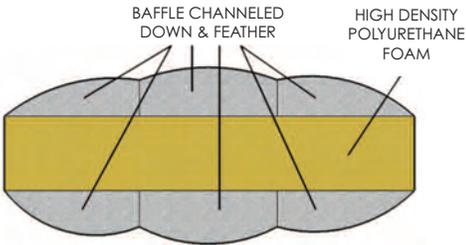

In addition to the diagrams below, custom options are also available.

LCD BEDS

The contemporary minimalist approach to architectural design has often replaced traditional walls in a room with floor to ceiling glass windows leaving no room for a television.

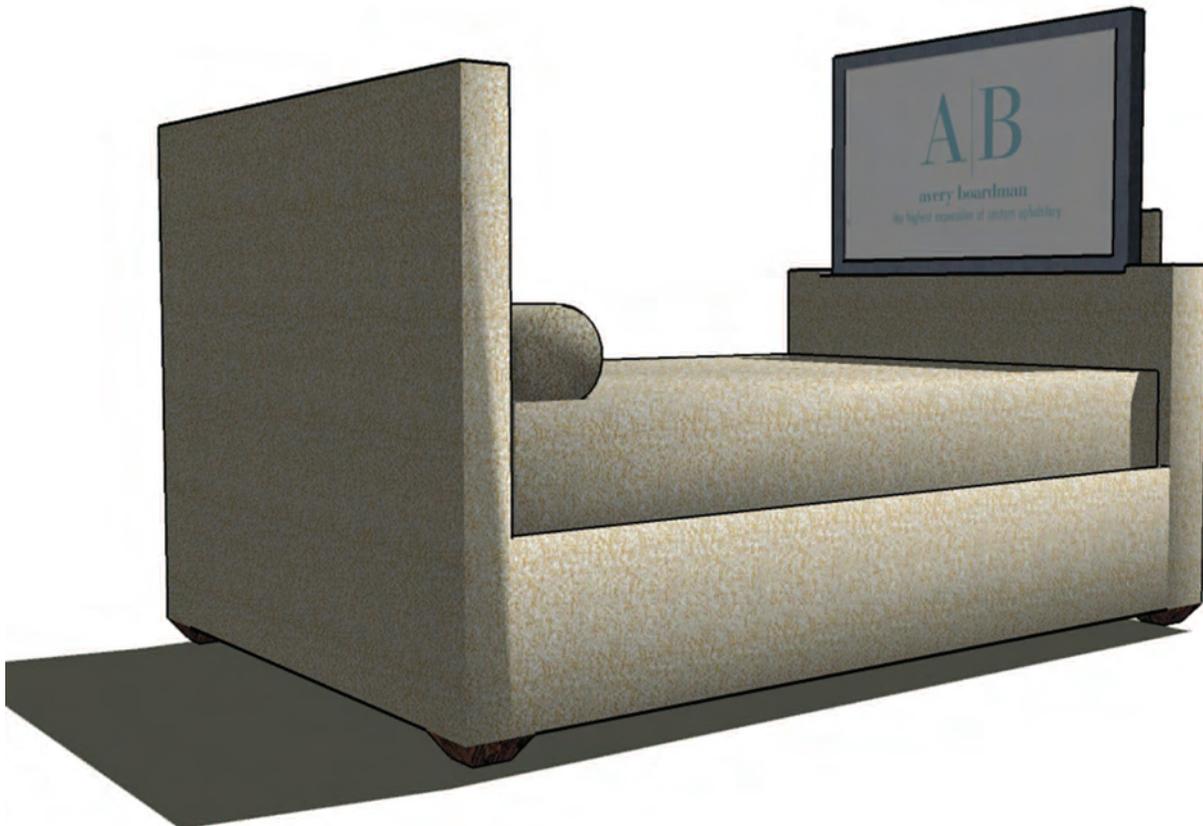

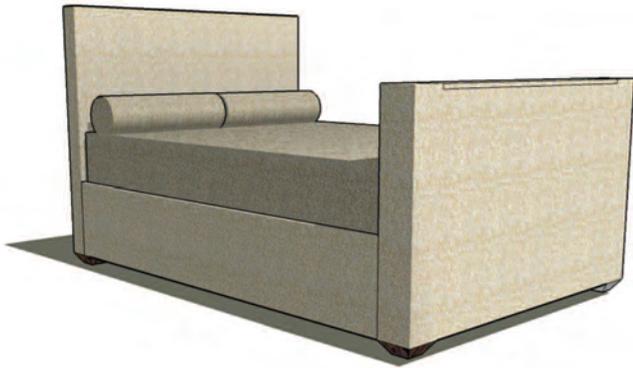

We have developed one of the most ingenious ways to conceal a TV in a bedroom.

Our noiseless, remote controlled TV-lift conceals

neatly within the narrow cavity of a footboard.

We can customize these elegant beds to reflect your personal desire for high style and uncompromised comfort. Please explore the endless possibilities by letting us help you design the bed of your dreams.

Below are some conceptual drawings.

GENERAL ORDERING PROCEDURES

- Purchase orders should be sent directly to one of our showrooms.
- All customer's own fabrics should be shipped directly to our factories. Please refer to your "customer's order" form for the address or consult one of our associates to obtain the correct shipping information.
- All C.O.M. must be carefully side marked with the name of the firm placing the order, the client's name and our order numbers.
- To avoid delays, please call your representative to obtain an order number.
- On demand, order numbers can be assigned prior to the receipt of the deposit.
- Unless a cutting of the fabric is provided in advance, cuttings of all C.O.M. fabrics received will be sent for your approval. Production will not start until all cuttings are approved. Lead time can significantly be reduced if you provide a cutting of the fabric in advance with application instructions.
- Please specify the direction, placement and proper side facing of your fabric.
- All yardages listed in this catalog are based on 54" wide, plain goods.
- If your fabric is not 54" and/or it has a repeat, please contact your representative or refer to the yardage chart below to calculate an approximate yardage.

FABRIC RAILROADING

- This is an important trade term that should be carefully understood by anyone specifying custom upholstery.
- When the fabric is railroaded, the job is cut length wise into the bolt of goods.

For example, if a sofa is 96" long and it has a single seat cushion, by railroading, it would make it possible to cut all the long pieces of fabric such as the seat cushion, front board, inside and outside back without resorting to seaming.

- Often railroading fabrics will provide a more fluid and flawless look.
- The pattern and the nature of the fabric will mostly dictate if railroading is applicable.

LEATHER REQUIREMENTS

- All styles are available in leather.
- Generally leather, irregular in shape and having natural defects, is sold by the square foot instead of the linear yard.
- A quick and reliable method to convert yards to usable square feet of leather, is to multiply yards x 18. As an example, if a sofa normally takes 20 yards of fabric and we upholstered it in leather, we would need a total of 360 square feet.
- 10% additional charge is assessed for leather application.
- Though we take great care in estimating yardages, shortages may occur due to unforeseen circumstances. Avery Boardman is not responsible for yardage shortages.
- Avery Boardman will use its discretion with regard to fabric direction and application unless expressly specified.
- All special instructions must be explicitly written in your purchase orders.
- All orders require a 50% deposit.
- All balances must be paid prior to shipping including all freight and shipping charges.
- We gladly accept credit cards.

- All dimensions and yardage requirements in this catalog are approximate.
- All prices quoted are F.O.B. Moonachie or Clifton, NJ.
- Not responsible for typographical errors and omissions.
