KINETIC

Astek has long been an innovator in the custom wallcovering space. With the launch of Kinetic, we continue to push the intersection of art and technology by introducing a groundbreaking approach to the medium.

In Astek's Kinetic series, contemporary motions unlock infinite possibilities for wallcovering. Each video, crafted using a proprietary process and drawing from a multitude of inspirational sources, contains a macrocosm of potential. Each motion boasts hundreds of frames—play, freeze, refine, and print your favorite to create a one-of-a-kind mural.

Moving texture, dynamic color, and ever-shifting compositions offer a myriad of murals with near-endless opportunities for customization. Paired with our unrivaled printing capabilities and premium substrates, Kinetic is set to redefine the wallcovering experience.

PRODUCTION

Each **Kinetic** design is digitally printed to each project's unique specifications. Advanced technology allows us to print on a wide range of substrates, match subtle colors with extreme precision, and print at high resolutions and speeds without sacrificing quality.

PLAY

Watch how the design moves and evolves.

FREEZE

Stop the motion at the composition of your choosing.

REFINE

Customize everything—color, texture, and scale—to fit your needs.

PRINT

The final mural is printed in vivid detail on the wallcovering substrate of your choice.
